

Universität Stuttgart

**Fakultät 5: Informatik,
Elektrotechnik und
Informationstechnik**

Einladende Abteilung:
Anwendersoftware (AS)

Fakultät Informatik, Elektrotechnik und Informationstechnik,
Universitätsstraße 38, D – 70569 Stuttgart

Sekretariat:
Telefon (0711) 7816 456
Telefax (0711) 7816 340

Einladung zum Informatik-Kolloquium

Im Rahmen des Informatik-Kolloquiums spricht

**Dr. Nelson Mattos
VP Engineering - EMEA
Google Switzerland GmbH**

**am Donnerstag, dem 12. November 2009 um 16:00 Uhr,
im Hörsaal V 38.01 des Informatikgebäudes
Universitätsstraße 38, 70569 Stuttgart**

über:

Are there limits to computing opportunities?

Computer science is like art: it encompasses and interacts with many fields, and maybe most of all, it offers fantastic opportunities for creativity and innovativeness. In fact, computer science can even "be" art, from creating beautiful algorithms to designing amazing architectures. And maybe in a more impactful way, computing can make a positive and rewarding difference in the world, so rapidly that you will be constantly stimulated by new, complex challenges and work will translate into fun. Be passionate and join the forces of computer scientists!
